

What Is Your Desired Hearing Lifestyle?

QUIET
MINIMAL BACKGROUND NOISE

The diagram for the Quiet lifestyle shows a central white silhouette of a person's head with a hearing aid, surrounded by three icons: a television, a car, and two people talking. The background is a warm orange gradient. Below the diagram is a photograph of an elderly woman with short white hair and glasses, smiling and holding a glass of orange juice.

SOCIAL
OCCASIONAL BACKGROUND NOISE

The diagram for the Social lifestyle shows a central white silhouette of a person's head with a hearing aid, surrounded by four icons: a television, a car, two people talking, and a group of three people. The background is a warm orange gradient. Below the diagram is a photograph of an elderly couple sitting together, with the woman embracing the man from behind.

ACTIVE
MODERATE BACKGROUND NOISE

The diagram for the Active lifestyle shows a central white silhouette of a person's head with a hearing aid, surrounded by five icons: a television, a car, a shopping basket, two people talking, and a group of three people. The background is a light blue gradient. Below the diagram is a photograph of an elderly woman smiling and talking to another person.

DYNAMIC
FREQUENT BACKGROUND NOISE

The diagram for the Dynamic lifestyle shows a central white silhouette of a person's head with a hearing aid, surrounded by six icons: a television, a car, a shopping basket, two people talking, a group of three people, and a building. The background is a dark blue gradient. Below the diagram is a photograph of an elderly couple dancing at an outdoor event.

Choose the Right Treatment Plan

QUIET

If you like the quiet life and tend to avoid noisy places, this option is ideal. Hearing aids at the essential level improve basic communication in generally quiet environments. They are the most affordable option as they don't include many features or tools for fine-tuning.

SOCIAL

This is the preferred option for individuals who are occasionally in noisy places. Features such as noise reduction and enhanced directionality allow you to feel comfortable hearing in moderately noisy environments, such as small groups.

ACTIVE

Designed for individuals with an active lifestyle, this option offers optimized speech awareness even in noisy places. Hearing aids at the advanced level enhance your hearing across a variety of soundscapes.

DYNAMIC

If your busy lifestyle means you need a seamless listening experience in the most demanding environments, this is your optimal choice. Premium-level hearing aids offer outstanding performance in dynamic listening situations so that you can feel confident wherever life takes you.
